

Water Quality Concerns in Central Indiana: Protecting Your Family's Health

Dear Central Indiana Neighbors,

As residents of Johnson County, Columbus, and Indianapolis, we all face significant water quality challenges that can impact the health and well-being of our families. At Johnson Comfort, based right here in Franklin, Indiana, we are committed to educating our community about these issues and offering effective solutions to ensure safe, clean water in every home.

Common Water Quality Issues in Central Indiana

Hard Water

Central Indiana is known for its hard water, which contains high levels of minerals like calcium and magnesium. While not directly harmful to health, hard water can cause:

- Dry, itchy skin and hair
- Soap scum buildup in sinks and bathtubs
- Reduced efficiency of water heaters and appliances
- Stains on clothing and dishes

Contaminants and Pollutants

Our region's water sources may contain various contaminants, including:

- Nitrates from agricultural runoff
- Lead from older plumbing systems
- Chlorine and disinfection byproducts

- Trace pharmaceuticals and personal care products

These contaminants can pose health risks, especially for children, pregnant women, and individuals with compromised immune systems.

Ensuring Safe Water for Your Home

Investing in a comprehensive water filtration system is crucial for protecting your family's health and improving your home's water quality. Johnson Comfort offers a range of solutions tailored to address Central Indiana's specific water challenges:

1. **Water Softeners:** Effectively remove excess minerals, solving hard water issues and extending the life of your appliances.
2. **Carbon Filters:** Reduce chlorine, improve taste and odor, and remove many organic contaminants.
3. **Reverse Osmosis Systems:** Provide the highest level of filtration, removing up to 99% of contaminants, including lead, nitrates, and pharmaceuticals.

Benefits of Clean, Filtered Water

By installing a water filtration system, you can enjoy numerous benefits:

- Improved taste and odor of drinking water
- Softer skin and hair
- Longer-lasting appliances and plumbing fixtures
- Reduced need for bottled water, saving money and reducing plastic waste
- Peace of mind knowing your family is protected from harmful contaminants

Johnson Comfort: Your Partner in Water Quality

At Johnson Comfort, our mission is to create Safety & Comfort for our community. We understand the unique water quality challenges faced by Central Indiana residents and are committed to providing tailored solutions to ensure clean, safe water in every home.
